

PARTNERSHIP 2023-2024

THE COMPANY

Erreà Sport is an Italian company that specialises in the production of technical sportswear.

We are an internationally recognised brand that is synonymous with quality, expertise and experience in the sports sector.

Founded in 1988, Erreà Sport is now an established international name, present in over 80 different countries around the world, with more than 500 sponsorship partnerships including not just football, volleyball, basket and rugby, but many other sports as well.

Our strength as a manufacturer and autonomous control of the entire production process, from the choice of yarns to the study of products and the creation and final packaging of the items of clothing, have resulted in the company receiving Oeko-Tex Certification in 2007, which attests to the safety of our in terms of health and the quality of all our garments.

Through our products, we bring wellbeing every day to anyone taking part in sports, making a real difference to the performances of those who wear them, being a leader in the teamwear sector, with a brand built on passion, technological innovation and stylish design, is what constitutes our company Vision.

THE PRODUCT

All Erreà products have one common denominator, the quality and strength of the fabrics. Added to this are the comfortable wearability and original designs of the garments and the continued research into new products.

Erreà control every phase of the production process, starting from the selection of the raw materials. Fabric and colours must correspond to the most severe of the European quality standards. The square metre weight of the fabric is scrupulously controlled and the evaluation of the colour is performed using a specialised, certified light-cabinet. Once the fabrics have passed these rigid quality controls, they are stored in special warehouses.

The traditional cutting method for the fabrics has been replaced by a sophisticated computerised system, which ensures maximum precision even for the smallest of pieces. In some cases, in order for the garments to achieve their final look, the fabric is passed through a heat transfer process. At the final stage of the production line, the various pieces of the garments are assembled and sewn together.

Erreà unite technology and tradition. In fact, even today, the final stages of the production process are done by hand. The final result is extraordinary: a combination of technical fabrics and captivating ranges, which provide the essential characteristics for use at every level of sporting activity, the combination of comfort and strength. The warehousing section is also structured in a modern and highly advanced way.

A bar-code based system makes it possible to computerise the management of stock levels, orders and deliveries, helping to optimise space and streamline delivery times. Erreà are, therefore, a perfect combination of passion, advanced technology and design: for more than twenty years a benchmark in the world of sport and a recognised brand at national and international levels.

All the Erreà products can be found on the web-site at www.erreà.com and in a main catalogue which has more than 200 pages and is published every three years, with new items added periodically.
